Gentle washer for inner wear

WOMEN usually wash their undergarments by hand. This is because normal washing machines are unsuitable in handling ladies' undergarments which are made of elastic and delicate fabrics. The second reason is attributed to privacy as well as personal hygiene.

Many new mothers face the problem and inconvenience of manually washing baby clothes.

Babies have a low immune system and are sensitive to many irritants, which can be found in soiled adult wear and normal detergent. Baby clothing is usually stained with milk which makes it easy for germs and bacteria to breed. Thus it is advisable to wash the clothes separately with hot water.

Khind-Mistral (M) Sdn Bhd has recently developed a mini washer called Jelita Ladies Personal Washer MWM2F. It is specially designed for busy working women as well as those with infants.

Unlike normal washers, the mini washer only has a 2.2kg capacity and is small enough to be placed in the bathroom. It is the perfect washer to handle small loads of clothing such as baby garments and lingerie.

More importantly, the Jelita Ladies Personal Washer comes with a gentle wash function specially designed to protect ladies' undergarments or lingerie from being stretched or damaged. It also comes with an auto but gentle spin dry function. The Jelita Ladies Personal

Washer comes in two soothing colours – Light Pink and Winter Grey. It carries a two-year product warranty and free outdoor service is offered for the same duration.

Khind-Mistral (M) has also recently launched a consumer promotion on this washer.

For every purchase of the Jelita Ladies Personal washer, a My Little Raccoon EyeCare desk lamp worth RM99 will be given away free. This desk lamp is flicker-free, provides optimum brightness as well as low glare. The lamp is available in pearl white, pink and light blue. It also has a three-year product warranty.

Khind-Mistral (M) Sdn Bhd is the marketing arm of Khind Holdings Berhad, which has exported its products to more than 50 countries.
